

Onboarding email / reminder

Hi _____,

In preparation for tomorrow's exercise I'd like you to pick a question that went unanswered from your earlier deployment. If you need help choosing, consider the following prompt:

Imagine you have access to your home's indoor air quality data. What would you want to know about it? What would you want to do with it?

To refresh your memory, your deployment ran from <start_date> through <end_date> where we logged air quality within the <sensor1_location>, <sensor2_location>, and <sensor3_location>. We also have access to your eAsthma tracker survey data over the same timeframe.

Working together, our goal is to analyze and present your data in whichever way answers your question best!

We will review these details again when we meet. I just wanted to set the stage so you have some time to think about what you want to know :)

Thanks!

<researcher>
